PERSONAL INFORMATION

EMAIL	dhungel611@gmail.com , prasanga.dhungel@tum.de
LINKEDIN	linkedin.com/in/prasangadhungel
GITHUB	github.com/prasangadhungel
WEBSITE	prasangadhungel.com.np
ADDRESS	Munich, Germany
INTERESTS	Reliable/Interpretable ML, Statistical Inference, ML in non-Euclidean spaces

EDUCATION

Apr 2023	Masters in Informatics
Jun 2025	Technical University of Munich (TUM) , Munich, Germany Thesis: Efficient Large-Scale Data Pruning Using Score Extrapolation Supervisor: Prof. Stephan Günnemann Thesis Grade: 1.0/1.0 Major Coursework: Deep Learning, Statistical Learning, ML for Graphs and Sequential Data, Advanced NLP, Deep Generative Models, Computer Vision (Detection, Segmentation, Tracking), Computer Vision (Multiview Geometry), Quantum Computing, Tensor Networks, Deep Learning for Medicine Overall Grade: 1.2/1.0, Passed with High Distinction (Top 10 %)
Nov 2016	Bachelors In Computer Engineering
Apr 2021	Institute of Engineering , Pulchowk Campus, Nepal Major Coursework: Calculus, Linear Algebra, Probability, Statistics, Data Structures and Algorithms, Discrete Structures, Theory of Computation, Computer Architectures, Operating Systems, Artificial Intelligence, Data Mining, Big Data Grade: 79.57% in aggregate (Top 5 %)

PUBLICATIONS

Jun 2025	Schmidt, Sebastian, Dhungel, Prasanga, et al. "Effective Data Pruning through Score Extrapolation." arXiv:2506.09010, 2025 (Submitted to ICLR 2026)
Dec 2020	Dhungel, Prasanga, et al. "An Efficient Video Compression Network." International Conference on Advances in Computing, Communication and Networking. IEEE, 2020

ACHIEVEMENTS AND AWARDS

Oct 2024	Awarded the Deutschlandstipendium (sponsored by Amazon), granted to the top 900 out of 50,000 students, providing financial support worth €3600
Jul 2016	Selected among top 5 students to represent Nepal at 47th International Physics Olympiad , Zürich Switzerland
Nov 2018	Represented Nepal in ACM-ICPC, Dhaka regionals
May 2020	Winner: A Day of Code
Feb 2019	Winner: Locus Codejam
Jan 2018	Winner: National Level Programming Contest
Sep 2020	Second Place: DandyHacks organized by the University of Rochester via Devpost

SKILLS

PL	Python (Expert), C++, C, R, Java, Javascript, MATLAB, Latex, Bash/Shell
AI & ML	PyTorch, TensorFlow, Scikit, Scipy, Huggingface, OpenCV, W&B
MLops	Azure, AWS, Terraform, Docker, CI/CD (GitLab, Github), MLflow, Databricks, Apache Airflow, Kubernetes (Basic), Prometheus, Grafana
Database	PostgreSQL, MySQL, ElasticSearch, MongoDB, SQLAlchemy, Spark, Snowflake
Web	FastAPI, Django, Flask, Streamlit, Nginx, React, Vuejs, HTML/CSS/Javascript

WORK EXPERIENCE

Apr 2025 Present	Machine Learning Engineer, E.ON , Munich, Germany - Architected end-to-end ML system on Azure using Terraform for infrastructure-as-code, enabling reproducible and scalable deployments with 99% uptime. - Built a comprehensive model lifecycle management using MLflow for experiment tracking, hyperparameter optimization, versioning, and performance monitoring. - Led recruitment, onboarding, and mentorship of two junior data scientists, fostering a high-performing, collaborative, and learning-focused environment
Sep 2023 Mar 2025	Data Scientist (Working Student), E.ON , Munich, Germany - Developed novel Robust-PLS algorithm optimized for high-dimensional, correlated feature spaces with outliers, achieving 7% improvement in MAE. - Implemented custom noise detection and reduction algorithms, improving sensor reliability metrics across deployment scenarios. - Partnered with hardware suppliers and stakeholders to translate sensor physics into ML feature engineering strategies, establishing data-driven decision frameworks.
Apr 2021 Mar 2023	Data Scientist, Naamche Inc , Kathmandu, Nepal - Developed end-to-end ML systems for real estate investment optimization, processing \$20M+ in property evaluations. Trained ensemble of ARIMA, Prophet, and LSTM to forecast revenue that only had 14% of error on hindsight. Worked on a physical and geospatial feature extraction pipeline, analyzing 100K+ properties. - Architected a conversational real estate assistant. Implemented BERT-based intent classification and developed custom NLG (GPT-2 fine-tuning) for human-like property descriptions.

PROJECTS AND RESEARCH

Dec 2024 Jun 2025	Efficient Large Scale Data Pruning with Extrapolation , Master's Thesis Proposed a novel framework for large-scale dataset pruning that eliminates costly full-dataset scoring. Our method extrapolates importance scores using geometric data structure (KNN, GNNs), yielding competitive model performance with substantial end-to-end training time savings across multiple benchmarks and pruning techniques.
Sep 2023 Mar 2025	Video Compression Net , Bachelor's Thesis A Deep Learning based video compression system that minimizes the number of bits required to encode video frames while also reducing distortion. The primary objective of the project was to replace conventional components in the video compression pipeline with their neural network equivalents. The trained model achieved the same compression ratio as the conventional system.

LANGUAGE PROFICIENCY

English	Full Professional Proficiency (TOEFL 109)
German	Basic Conversational
